

# OPERATING INSTRUCTIONS

## Filling the Atomizer\*:

1. Place a paper towel under your work surface
2. Unscrew the atomizer from the battery before filling
3. Unscrew the mouthpiece from the atomizer and set it to the side
4. Tilt the atomizer to 45° to the side and slowly drip the e-liquid onto the inside wall of the atomizer until 75% full (Do NOT drip liquid into the center metal cylinder. If eLiquid gets into the center tube, reattach the mouthpiece and forcefully blow into it to clear the tube. Wipe any excess eLiquid from the bottom of the atomizer BEFORE reattaching the battery).
5. Reattach the mouthpiece and battery
6. Before using your e-cigarette for the first time, allow 1-2 minutes for the wicks to absorb enough liquid to become saturated.

## How to Operate Your E-cigarette:

### eGo 900 & 650 Instructions
